

Portfolio Website

By Brandon Vonhoff

Walk-through of Portfolio Website

Breakdown of design
components and
decisions

Walk-through of
website and its pages

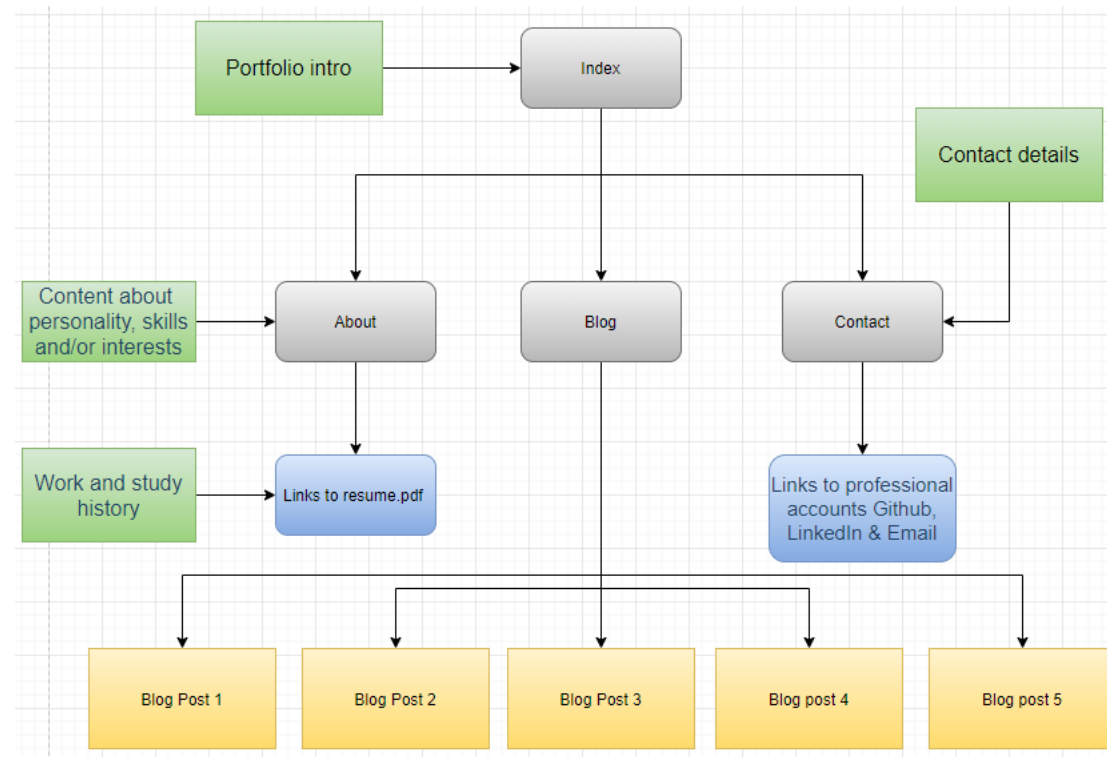

Review of
development and
build process

Targets for My Portfolio

- Create a website that can be altered later on
- Design the website to be clean and easily traversed
- Design it to be responsive and accessible across different devices

Portfolio Sitemap

Design & Decisions

Tech Stack

HTML

CSS

JavaScript

PHP & AJAX (to be
developed further &
implemented)

Design & Decisions Components Used

- Navigation bar
- Logo
- Footer – includes copyright notice & links to LinkedIn, GitHub
- Headings
- Sections
- Articles
- Divs
- Links
- Images
- Form
- Call-To-Action button (contact form)
- Media breakpoints (for responsiveness)

Design & Decisions

Colour Themes and Fonts used

Theme Colours:

#292f38
rgb(41,47,56)

#F5F5F5
rgb(245,245,245)

#BEBBCB
rgb(190,188,188)

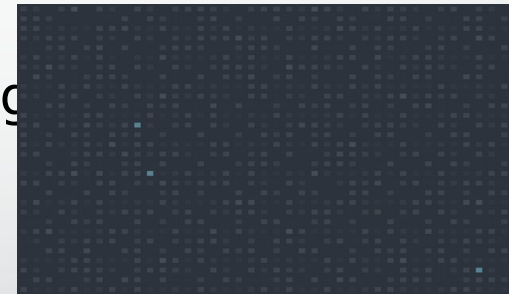

#547D91
rgb(84,125,145)

#0D5DC5
rgb(13,93,197)

Design & Decisions

Universal Components for all Pages

Design Choice: I aimed for a minimalistic design with ease of access and responsiveness in mind

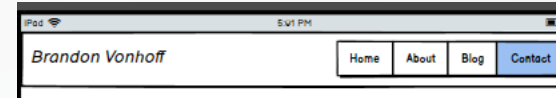

- I created a free logo from FreeLogoDesgin
 - Logo and navbar are responsive
 - Links & containers possess animations
 - Implemented icon links to GitHub, LinkedIn, and email
- Included a copyright notice in footer

Header (Logo & navbar)

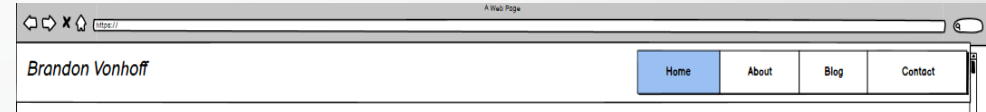

- Mobile:

- Tablet:

- Desktop:

Footer (copyright notice & professional links)

- Mobile:

- Tablet:

- Desktop:

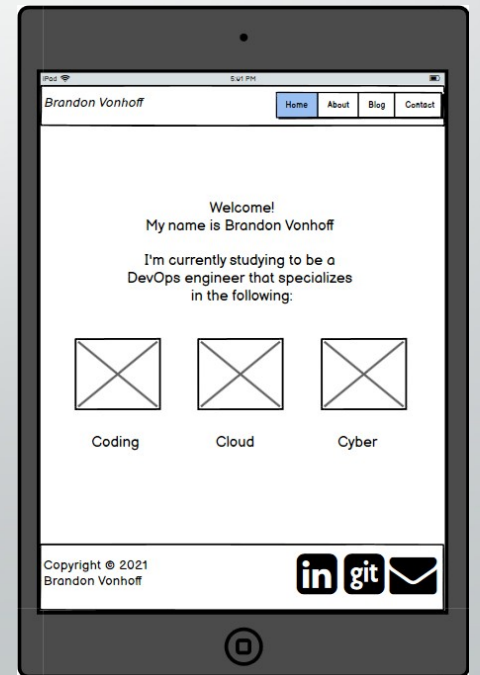

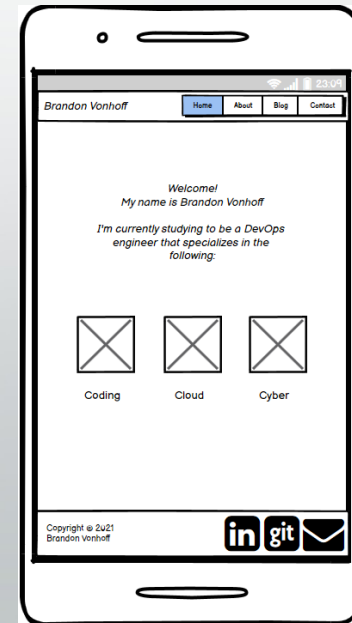

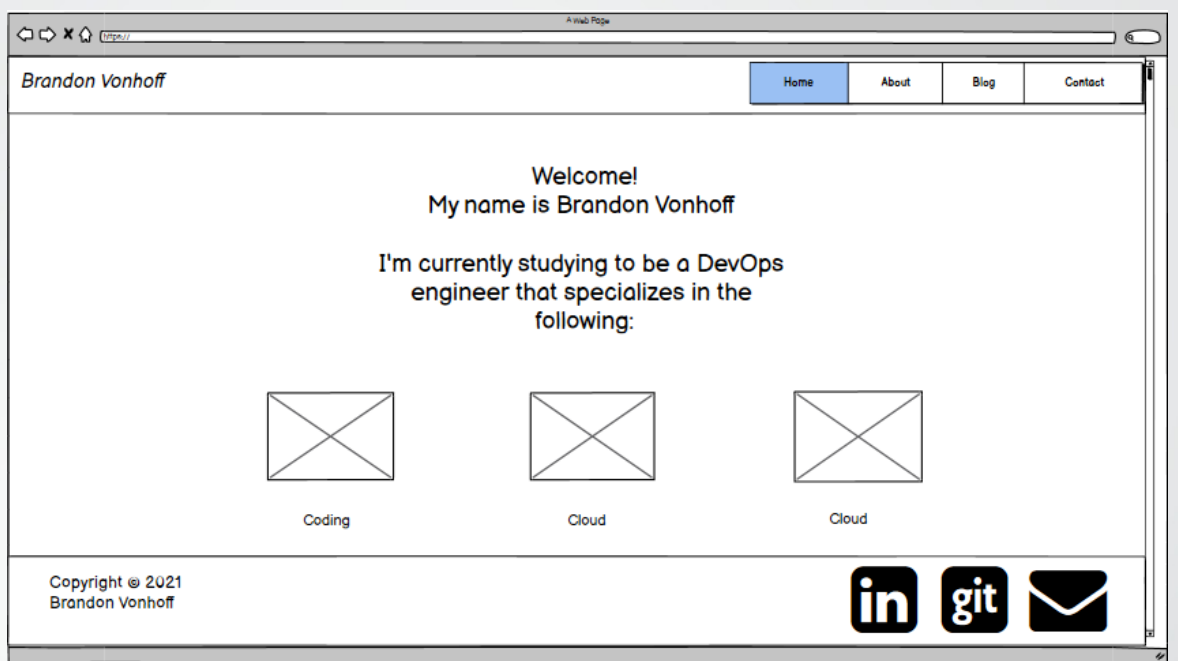

Design & Decisions Home Page

Components:

- Section container for:
 - Introductory text
 - Areas of study
- Article container for:
 - Images of study areas

Page function:

- Page changes width based on device
- Plenty of white space for ease of use

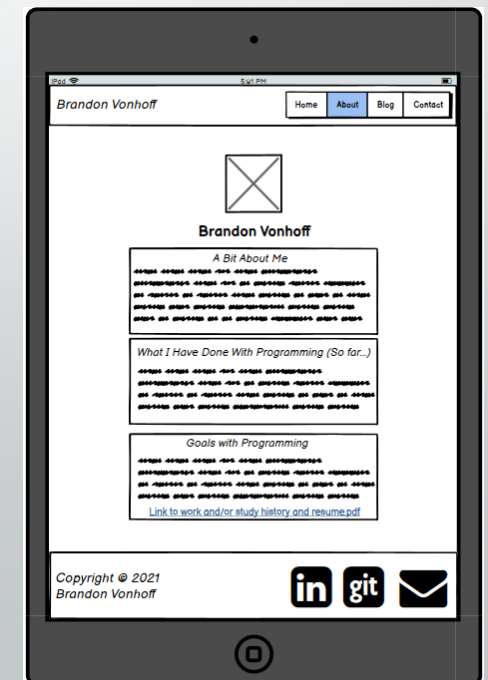

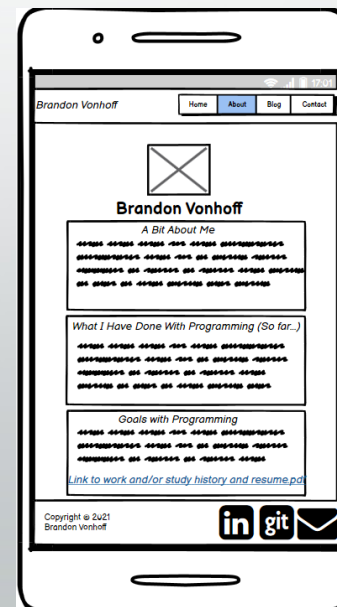

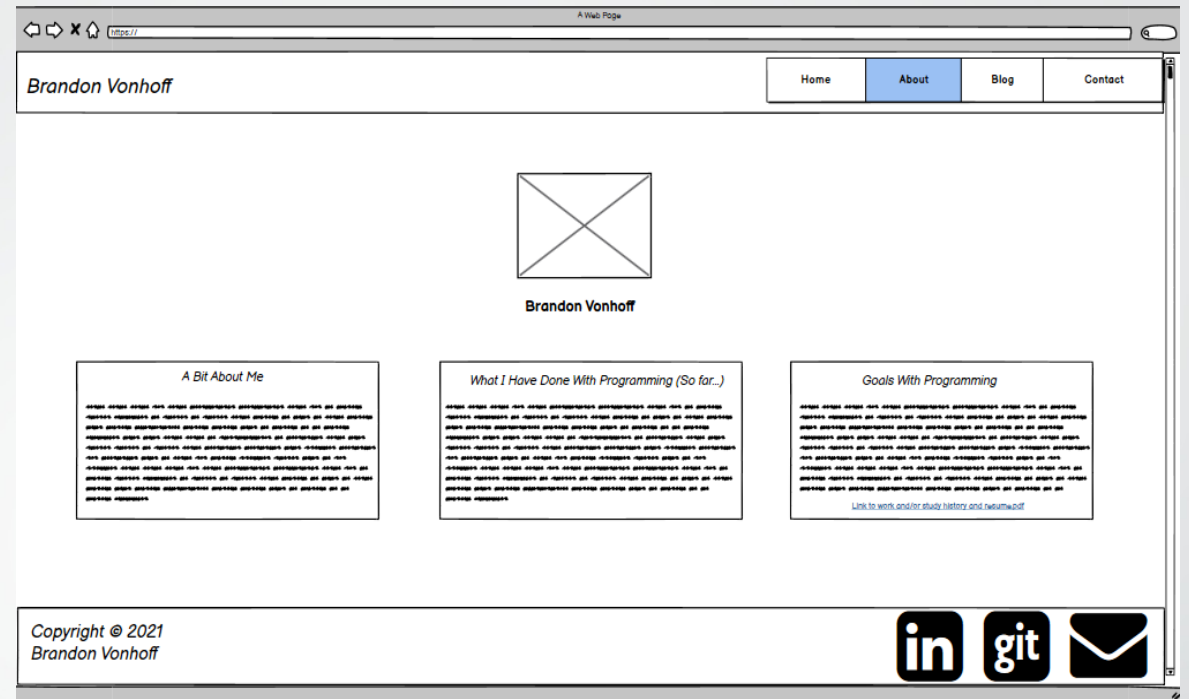

Design & Decisions About Page

Components:

- Container for image of self
 - Used figure tag
- Sections for each titbit about me
 - Last section contains link to resume.pdf

Page function:

- Elements form into single column for mobile and tablet
- Relevant information is labelled

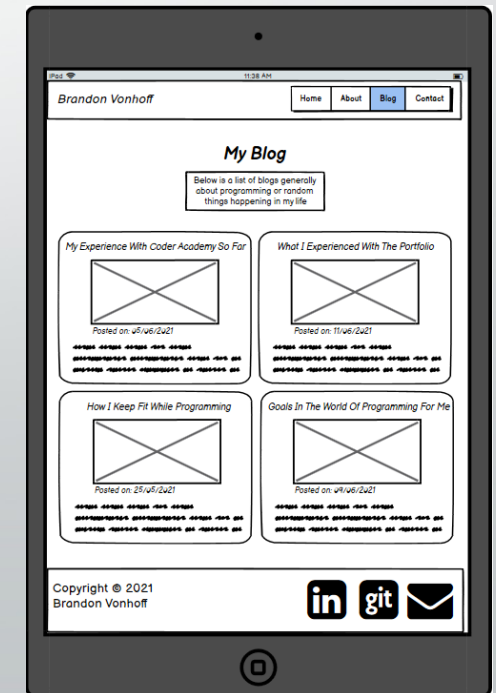

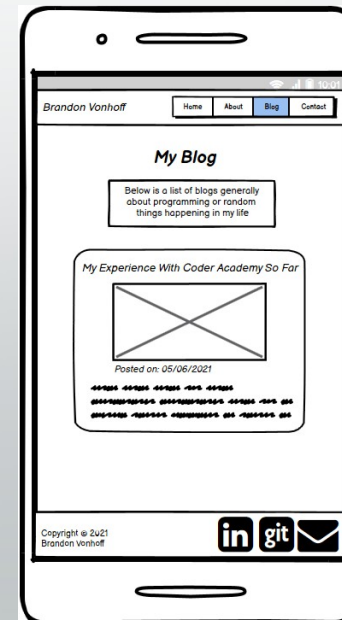

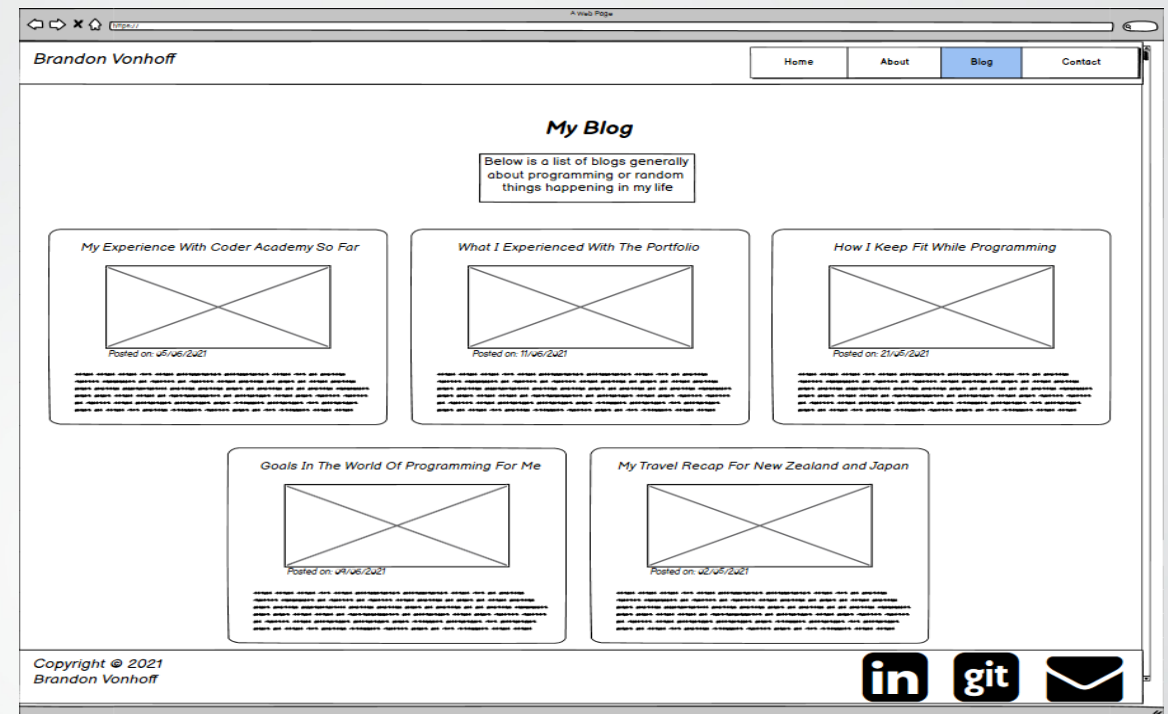

Design & Decisions Blog List Page

Components:

- Page intro & title
- Container for each blog
- Each blog contains blog title, image, date published, and content below

Page function:

- Blog containers form intro single column layout for mobile and 2 column layout for tablet
- Both the images & title of blogs are links to post pages

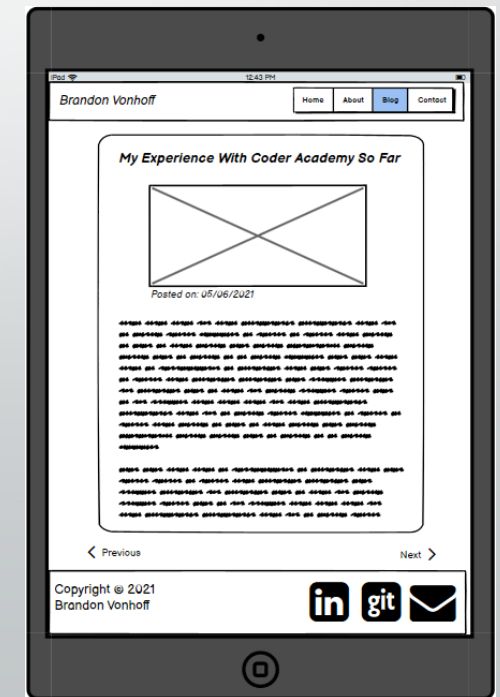

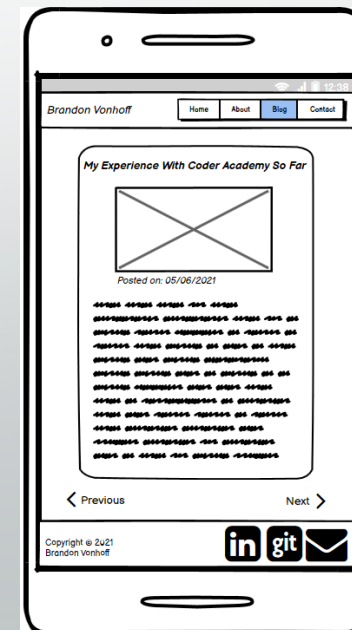

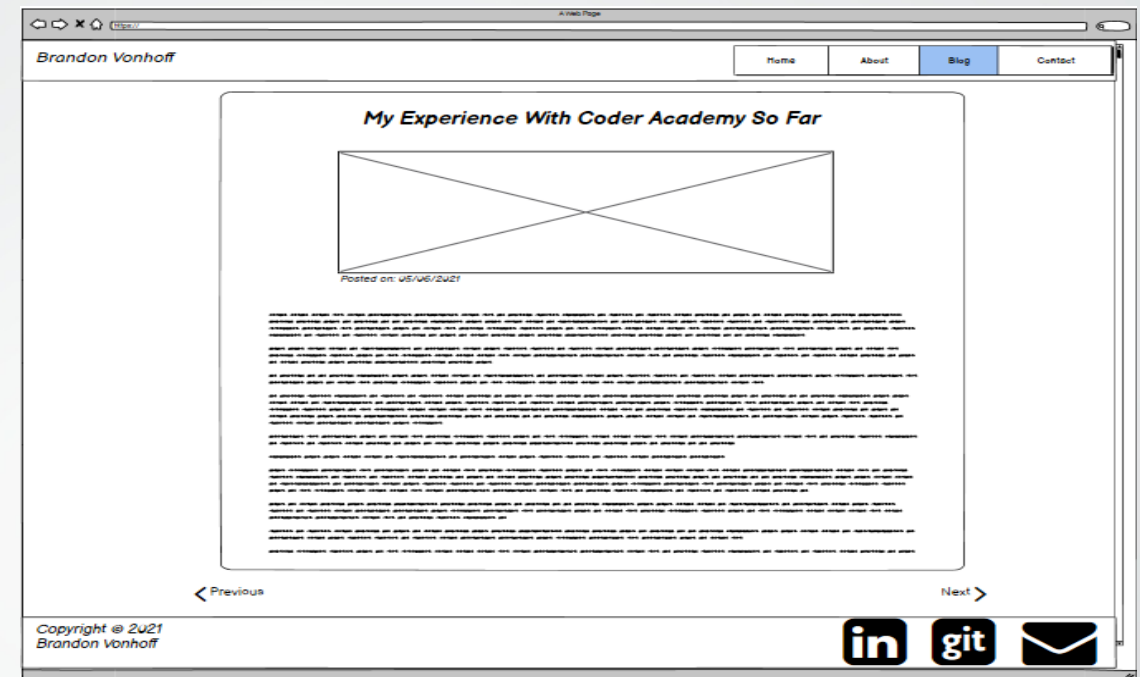

Design & Decisions Blog Post Page

Components:

- Title, image, & published date (content below)
- Next & previous button for other blog posts

Page function:

- Container for blog post is responsive depending on device

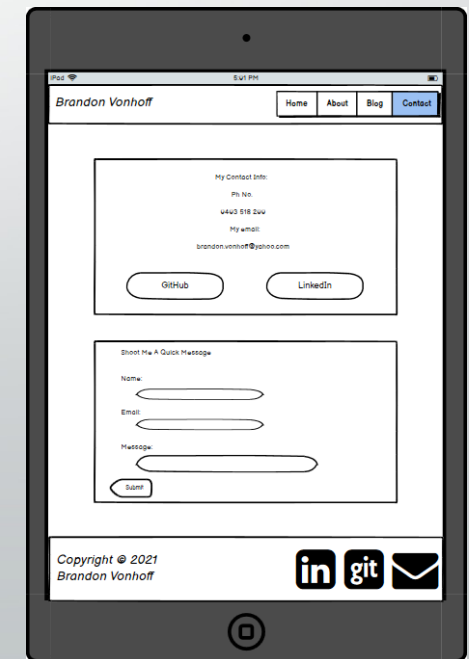

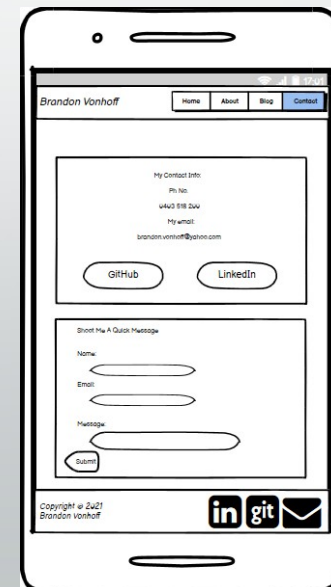

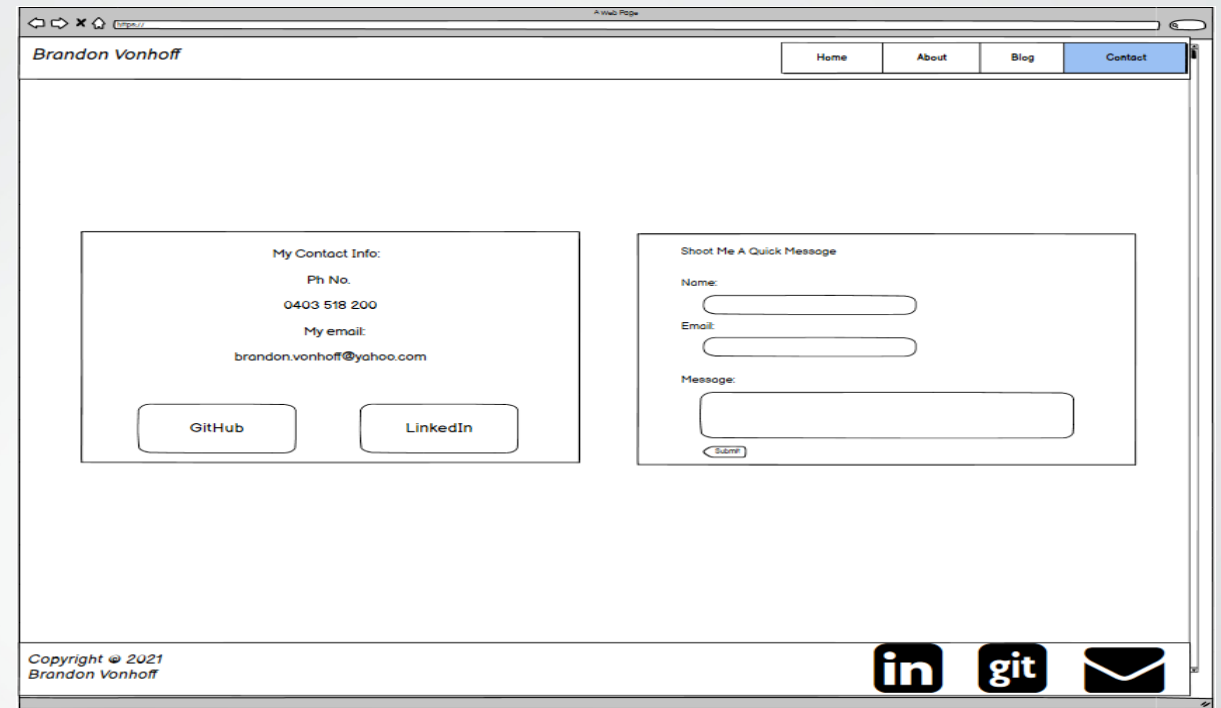

Design & Decisions Contact Page

Components:

- Article container for Contact Info
 - Including links to GitHub & LinkedIn
- Form that utilizes mailto action to send email

Page function:

- Elements form into single column for mobile and tablet

Development & Build Process Challenges

- Learning while designing and coding
- Constantly reiterating designs
- Slowed by lack of knowledge
- Responsive design

Development & Build Process

Favourite Parts

- Seeing the project come to life (slowly...)
- Becoming more familiar with the process
- Creating own professional-esque portfolio

Development & Build Process

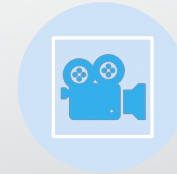

Future Implements

Implement a
hamburger menu for
mobile and tablet

Use PHP and AJAX to
incorporate a
functional server-
side contact form

Introduce more page
animations for
interaction
